SUMMARY

Finance and Management graduate (B.S., Syracuse University, 2026) working in accounting and payroll operations, seeking a junior FP&A or financial analyst role. Builds driver-based financial models from SEC filings and publishes them with the checks and limits shown.

EXPERIENCE

Assistant Accountant Marketstaff (HR services firm) June 2026 – Present

- Process payroll for 18 clients across monthly, semimonthly and bi-weekly cycles.
- Monitor company cash flow against monthly spend and support forecasting.
- Complete monthly bank and insurance-benefit reconciliations; manage accounts payable and receivable and issue invoices for services rendered.
- Produce ad hoc reports on payroll, insurance benefits, company demographics and other requests.
- Validate HRIS data and maintain the organizational chart and compensation-range catalog for roughly 150 employees as roles and reporting lines change.
- Run the annual compensation process, including merit increases and bonus administration, with accurate data entry and calculations; support the annual performance-review cycle and open enrollment.
- Track employee eligibility dates for insurance and retirement plans; handle full-cycle onboarding and offboarding and answer employee payroll and benefits questions.

Accounting and Payroll Intern Marketstaff Summer 2025

- Supported payroll, accounts payable and receivable, and HR data work that became the full-time role above.

FINANCE PROJECTS (each with a live page and downloadable model on the portfolio site)

- **monday.com Operating Plan and Rolling Reforecast.** Built a two-scenario plan with explicit triggers, then locked it with timestamped, hash-verified releases before the Q3 2026 earnings date; scoring against actual results follows. 349 workbook checks pass.
- **FP&A Intelligence Engine.** AI drafts a finance brief from a benchmark; code decides whether it is accepted. Tested the checker itself with a 55-case validation lab and published what it misses; 739 automated test cases.
- **Nike North America Recovery.** Driver-based three-statement model with bull, base and bear scenarios.
- **Caterpillar demand-quality analysis, Microsoft–Activision M&A analysis** and **Arm IPO valuation,** each built from public filings.

EDUCATION

Syracuse University, Syracuse, NY – B.S., Finance and Management 2022 – 2026
